

Green Innovation Micro-Grant 2026

Draft Funding Application — Test Case

Applicant Information

Organization: EcoSpark Community Solutions Pvt. Ltd.

Location: Hyderabad, Telangana, India

Organization type: Private limited company

Years operating: 3 years

Authorized representative: Ananya Rao, Director

Project Information

Project title: Solar-Powered Community Cooling Hub

Project description: EcoSpark proposes to install rooftop solar panels and efficient cooling equipment at a community facility in Hyderabad. The project is expected to reduce electricity consumption and improve cooling access during summer months.

Requested funding: INR 450,000

Environmental Benefit

We expect the project to reduce electricity consumption by approximately 20% and reduce annual carbon emissions by approximately 12 tonnes. The project will also demonstrate renewable-energy adoption for other community facilities.

Implementation Plan

Month 1: finalize site and equipment selection.

Month 2: procure equipment and complete installation.

Month 3: commission the system and begin monitoring.

Budget

Solar equipment: INR 280,000

Cooling equipment: INR 120,000

Installation: INR 50,000

Total: INR 450,000

Supporting Evidence Included With This Draft

No registration certificate, detailed budget attachment, implementation-plan attachment, or authorized representative declaration is included with this test draft.

Additional Claim

EcoSpark has successfully completed more than 20 similar sustainability projects for local institutions.

Applicant Declaration

This is a draft application prepared for testing the GrantCheck review workflow. It should not be treated as a real funding submission.

Expected GrantCheck Test Behavior

This draft intentionally contains both evidence-supported and unsupported/insufficiently evidenced information. The reviewer should be able to identify missing mandatory supporting documents, map application claims to guideline requirements, flag claims without supplied evidence, and ask clarification questions.
